Phone: (555) 987-6543

**Professional Summary:**

Resourceful Database Administrator with a solid background in SQL, MSSQL, and PostgreSQL. Proficient in maintaining database integrity and performance optimization. Skilled in collaborating with team members to design effective database schemas. Capable of working independently on multiple assignments and as part of a team.

**Work Experience:**

Database Administrator

DataTech Solutions, Cityville, USA

July 2019 - Present

Built and maintained database systems for various projects, ensuring high availability and data integrity.

Worked with team leads to design efficient database schemas using ER diagrams.

Installed and configured database instances in coordination with infrastructure teams.

Monitored database performance and applied changes as needed to optimize performance.

Assisted developers with query tuning and schema refinement.

Managed database parameters to ensure fast query response and minimize downtime.

Enforced database policies and procedures, including security controls and user access monitoring.

Developed and periodically tested backup and recovery plans for databases.

Junior Database Administrator

DataTech Solutions, Cityville, USA

January 2017 - June 2019

Supported senior database administrators in maintaining database systems.

Assisted in database performance monitoring and optimization efforts.

Contributed to the design and implementation of database schemas.

Helped enforce database policies and procedures.
